

IN THE SPECIFICATION:

Please AMEND the specification as follows:

On page 1, first paragraph, please amend as follows

This invention relates to rainwater collection systems and in particular to apparatus for separating an initial flow of contaminated rainwater from rainwater flowing from a collection area to a storage or usage area. This invention is an improvement or modification of the invention described and claimed in my Australian Patent Specification No. 692835, which is a granted patent resulting from application 16551/95.
